Where AI fits in the architecture

Numerical code makes portfolio decisions. Automatic LLM calls are not connected.

HUMAN OWNERSHIP Universe, allocation policy and risk limits **$3M ensemble + $2M central cash**

LANE 1 / NON-AI QUANTITATIVE CODE

Rules + mathematics

Data + validation | NON-AI
USD equity closes + SPY; completed sessions

Trend | NON-AI
MA 10 / 60 + market filter

Momentum | NON-AI
Ranking + volatility sizing

Reversion | NON-AI
Equity spread Z-scores

Ensemble PM + regime rules | NON-AI
Regime / equal weight / inverse volatility | Aggregate shared symbols

Fund risk | NON-AI
Exposure caps + drawdown controls
Phantom Book = exposure arithmetic

Intention records | NON-AI
Exact approval + confirmed snapshot
No broker orders; zero fills

Signals, allocations and approvals are computed by numerical code.

FundCoordinator: fixed sequence in one Python process (NON-AI).

FACTS

LANE 2 / AI-READY ADVISORY ROLES

Optional external LLM | AI
AI-generated replies can be imported
Automatic calls: NOT CONNECTED

Ensemble analyst | AI-READY
Today: read-only tools + code summary

Committee Chair | AI-READY
Today: read-only tools + code summary

Shared claim checks | NON-AI
Facts digest + metrics; used by both roles

AI commentary has zero trading authority.

Dashed arrows: optional replies / read-only facts.

SQLite + JSON storage + investor web app | NON-AI INFRASTRUCTURE **ZERO FILLS**

GREEN: NON-AI CODE | PURPLE: AI-READY ROLES / OPTIONAL AI | GRAY: NON-AI VALIDATION + INFRASTRUCTURE
